

DRINKING WATER PROBLEM CORRECTED

Customers of Onset Fire District were first notified on May 10, 2019 of a problem with our drinking water and were advised to 'BOIL' the water. We are pleased to report that the problem has been corrected and that the 'BOIL' is no longer necessary. We will continue to chlorinate the system and collect weekly bacteriological monitoring as required by MassDEP to monitor the situation while we reduce the chlorine on a schedule approved by MassDEP. We apologize for any inconvenience and thank you for your patience.

You may contact Onset Fire District at 508-295-0603 with any comments or questions.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.
